

WHAT IS CLAIMED IS:

1. An improved railway crossing comprising:
 - (a) a rail base;
 - (b) a pair of rail members coupled to said base by a rail clip assembly;
 - (c) a central panel coupled between said pair of rail members;
 - (d) a liner assembly including:
 - (1) a base portion;
 - (2) a pair of support arms secured to said base portion and formed of a pliable material to form a seal when engaged with said pair of rail members;
 - (3) a pair of liners each bonded to an upper vertical edge of said base portion a predetermined clearance distance from said pair of rail members which defines a flangeway; and
 - (4) wherein said liner is formed of ultra high molecular weight polyethylene material and serves to prevent wear of said base.
